

# PATIENT & FAMILY ADVISORY COUNCIL

Let's enhance patient-centered care together!

**Communication** ● **Collaboration** ● **Family Involvement** ● **Empowerment**

The Patient & Family Advisory Council (PFAC) is a group of volunteer patients, family members, caregivers, and staff that work together to ensure that patients receive the highest level of care. We use the constructive input that only patients and family members can provide to help us deliver higher levels of satisfaction. The committee meets monthly to address the needs and concerns of our patients and visitors.
