

Children's Hospital Los Angeles Center for Transyouth Health and Development

Background	Dedicated to providing affirming care for transgender and gender diverse children, adolescents, young adults and their families. The Center for Transyouth Health and Development (CTYHD) partners with youth and their families to advance the field through innovative practice, training and research through a multidisciplinary team.
Model	Rejects the gatekeeper model of care and focuses on how to help patients and families in the least restrictive environment possible. The CTYHD focuses on gender-affirming care and strives to make all patients and their families feel welcomed and understood.
